

Process to transition legacy Energex training courses to the new EQL Training Authorisation structure

Purpose

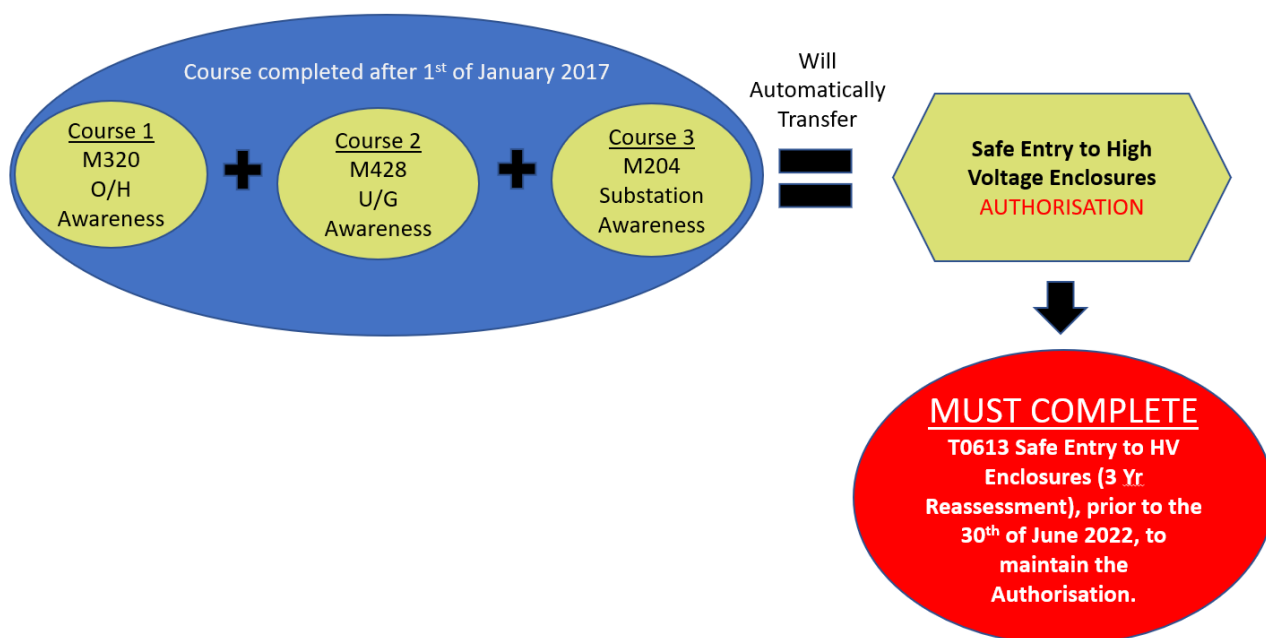

This document outlines the pathways for the transition of legacy Energex training outcomes to the new Energy Queensland (EQL) training Authorisation structure.

Transition of legacy Energex training courses to the new 'Safe Entry to High Voltage Enclosures' Authorisation

For those persons who have completed the legacy Energex initial training courses M320 Overhead Awareness + M428 Underground Awareness and M204 Substation Awareness, after the 1st of January 2017, will automatically be given the new EQL 'Safe Entry to High Voltage Enclosures' Authorisation.

The '4027 Safe Entry to High Voltage Enclosures (3 Yr Reassessment)' online course must be completed prior to the 30th of June 2022 to maintain this Authorisation.

Legacy Energex courses to transition new EQL Authorisation

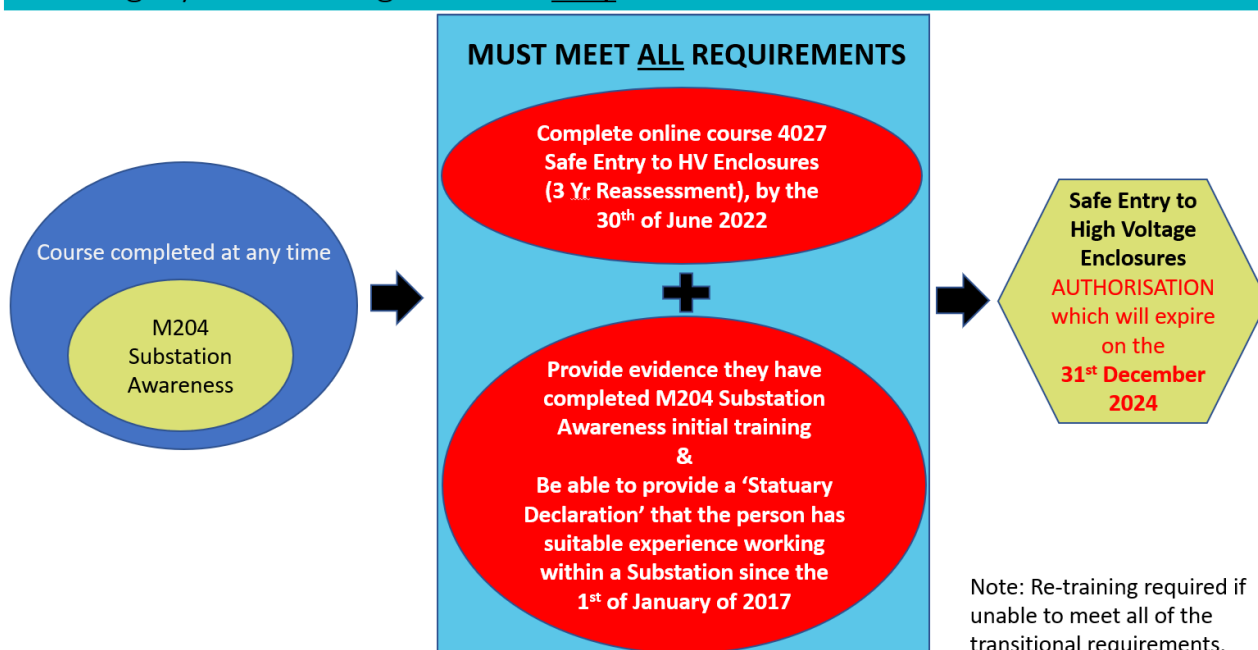

Transition of legacy Energex ‘M204 Substation Awareness’ training ONLY to the new ‘Safe Entry to High Voltage Enclosures’ Authorisation

There are a number of mandatory requirements for those persons wanting the new EQL ‘Safe Entry to High Voltage Enclosures’ authorisation but have only completed the legacy Energex M204 Substation Awareness training course. Individuals will need to follow the below steps to obtain the new ‘Safe Entry to High Voltage Enclosures’ authorisation

1. Be able to provide evidence they have completed the M204 Substation Awareness initial training,
2. Be able to provide a ‘Statutory Declaration’ that the person has suitable experience working within a Substation since the 1st of January of 2017,
3. Must complete the online training course ‘4027 Safe Entry to HV Enclosures (3 Yr Reassessment)’, by the 30th of June 2022

There is no time limit on when the legacy Energex M204 Substation Awareness Training course was initially completed. However, if any of the above requirements are unable to be met, then the person must complete the initial training again.

Legacy M204 Energex course only to transition new EQL Authorisation

Transition of legacy Energex training courses to the new 'Introduction to Electrical Network Infrastructure for Authorised Persons' training outcome

Any persons who has completed the legacy Energex initial training courses M320 Overhead Awareness or M428 Underground Awareness training course will automatically be given the new EQL 'T0911 Introduction to Electrical Network Infrastructure for Authorised Persons' training outcome.

There is no time limit on when the legacy Energex M320 Overhead Awareness or M428 Underground Awareness training course was initially completed.

Legacy Energex courses recognised for EQL Authorised Person applications
